

A telephone call
billing solution

Price List

If you are a minute's provider this system will not be for you, as Union Street or ebillz will give you everything you want. This is for Distributors who want to set up their resellers and bill them for both hardware, software, and minutes. There would be some customisation required to be able to read the CDRs from your minute's wholesaler. Currently it is set up for NFON. Resellers can get a quote which translates into an order and when fulfilled into an invoice.
