

# Team Rental & Bespoke Projects

Hire people or brief projects

## Price List

Team Rental is where we manage the resource quality and time, but the client manages the work. The team augments the client's existing software development resource. A bespoke project, however, is our GD&D's responsibility to manage and deliver but will be a fixed cost based on quantum of man-days. The end cost only changes when the brief changes and the client signs off on the additional cost.
