

CAM

Video management and
analytics for business

Price List

CCTV and Video surveillance can be sold in two ways. On premise for government, hospitals, or schools if they insist on an on-prem solution. Here we sell the server software and add 20%/annum support. For smaller installations or those enterprise companies who are up-to-date with market trends, a SaaS solution is the way to go.

Typical Quotation for SaaS Model

60 camera licenses @ £9/camera/month £540 per month
Includes recording, record on motion, virtual tripwire.

NB: £500 set up charge
