

Risk Management and
Analysis Software

Price List

Mitigate Risk Management and Analysis software is sold as a SaaS model which can be paid for yearly upfront or in monthly instalments which would be taken by Direct Debit. For Direct Debit, a 10% service charge is added to the yearly fee. In addition to this there is a one off £500 set up fee to configure the account. For the uninitiated, there are professional services for helping the company to set up the system charged at £1200 per day consultancy (2-3 days required). This covers inputting and scoring of risks and configuring of user dashboards.
